

# OUR PRODUCTS

Superior Jetties LLP can provide a variety of high-quality Marinas, Pontoons, Jetski Docking Systems, Dredging Floats for all types of public, club, rescue operations, resort / commercial requirements. Superior Jetties LLP operates on the technical know-how of it's Australian parent company.

We have a team of experts, which would guide you on the perfect berthing solution and provide full service including drafting, installation and accessories.

- Single piece rotomoulded modules
- Strong and durable structure
- Easy to clean
- Anti-slip surface
- Ribbed structure for increase strength

**Sizes Available:**  
 3m x 2m x 1.5m  
 3m x 1.5m x 1.5m

SUPERIOR MODULAR DOCKS

WORK PLATFORMS

- Polyethylene SMD Modules are tough
- UV resistant
- Versatile for arranging in any configuration.

FLOATING WALKWAYS

MARINAS

- Expandable system with tough, flexible rotational moulded polyethylene modules.
- UV stabilised polyethylene with 8-10 mm wall thickness
- Designed for harsh marine environment
- Optional cleats, handrail and fender available.
- Modules are easily mountable and moveable.

## JETTIES

- Tough
- UV resistant
- Versatile for arranging in any configuration.
- Superior Modular Dock is integrated with galvanized structure.

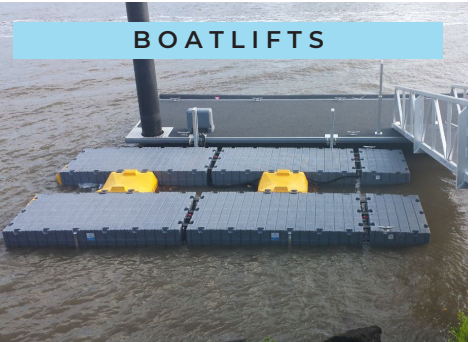

## PUMP PONTOONS

- Heavy duty/High impact rotomoulded polyethylene floats
- Floating cables/pipes/hoses with internal diameters ranging from 50mm to 400 mm and in 800mm
- Used in Ship to Shore applications Available in Orange colour.

## DREDGING, PIPE FLOATS

## BOATLIFTS

## JET SKI DOCKS

- Designed for non-deterioration in marine environment
- Can be easily connected to any marine structure.

**Boat Lift:** drives on pontoon technology. The vessel/boat can be driven straight to the lift to provide berthing out of water.

**Jet Ski Docks:** can connect to any pontoon, multiple docks can be connected side by side with dogbone connectors.

Superior Modular Docks (SMDs) are manufactured by rotational moulding of polyethylene with a specially profiled surface to ensure slip resistance and easy module connectivity.

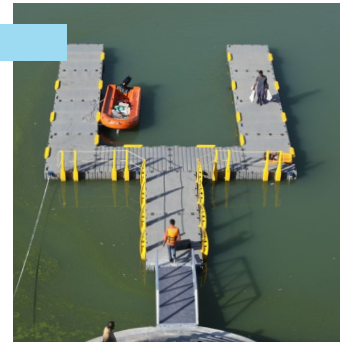

**Piled:** Attached to pontoon with specially designed heavy duty brackets. Suited for big vessels.

**Strut:** Hinged strut and gangway which allow for large tidal movement. Suited for small crafts.

**Cable:** Hinged gangway and SS steel cables. Ideal for small craft in estates and lakes.

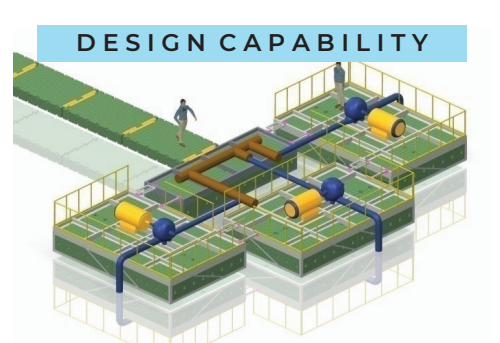

## ANCHORING

## REEDBEDS

These modules are designed with 3D CAD software and FEA analysis.
